

1729. Find Followers Count

Solved ✓

Easy Topics Companies

[SQL Schema](#) > [Pandas Schema](#) >

Table: Followers

Column Name	Type
user_id	int
follower_id	int

(user_id, follower_id) is the primary key (combination of columns with unique values) for this table.
This table contains the IDs of a user and a follower in a social media app where the follower follows the user.

Write a solution that will, for each user, return the number of followers.

Return the result table ordered by `user_id` in ascending order.

The result format is in the following example.

Example 1:

Input:

Followers table:

user_id	follower_id
0	1
1	0
2	0
2	1

Output:

user_id	followers_count
0	1
1	1
